

INSTRUCTIONS FOR THE INSTALLATION OF THE VIRION APPS FROM www.virion-project.eu

- 1. Create a meta-account (if you haven't already) in https://www.meta.com/
- Register this Meta account as Meta Developer in https://developer.oculus.com/sign-up/, and then create a Meta Organization
- 3. Activate the Developer Mode on your Meta Quest VR glasses (remember that you must have the official Meta Quest app ("Meta Horizon") installed on your smartphone_and it must be updated).
 - 3.1. Turn on your Meta Quest glasses (pictures and steps in these instructions based on iOS/iPhone)
 - 3.2 Open the Meta Quest app installed on your Smartphone (now called "Meta Horizon")
 - 3.3 Click on the Menu icon (at the bottom-right)

If your glasses don't appear, make sure you've connected them to your Meta account. To do this, click Connect new device and follow the steps indicated by the app and the glasses.

3.4. Click on the green icon that says "Configuration/Settings"3.5. Select the option "Activate developer mode"

Universidad Rey Juan Carlos Ready!! Now you can connect yourMeta Quest Glasses to a PC via USB port to install "indie" games or beta versions of games or apps that have not been released on the Meta Store (as the Virion Apps). Our recommendation is to use for that purpose "<u>Meta Quest Developer Hub</u>". Another alternative is to use <u>SideQuest</u>, so download and install one of those Apps on your PC (Windows or Mac)

Drag and Drop the APK file from the Windows Explorer to the META QUEST DEVELOPER HUB windows.

Done! Now you can put on your glasses on and enjoy the installed VIRION experience. Remember that you will find it in the "Applications from unknown sources" section on your applications library of the glasses.
